

To Whom It May Concern:

I live in Terrell County, and am lucky enough to be within "Grade B" or better coverage for three markets, Albany, GA, the DMA of which Terrell County is a part of, Columbus, GA and Tallahassee, FL.

Though several affiliates from our neighboring DMAs of Columbus, GA and Tallahassee, FL provide us with a "Grade B" signal, the local cable company, currently MediaCom, provides us with our local channels of WALB, WFXL, WABW, WACS, WVAG and WSST, along with only the ABC and CBS affiliate, WTVM and WRBL, respectively from the Columbus, GA DMA, that is listed on the list for Terrell County as being "Significantly Viewed".

However, MediaCom also provides us with WSB-TV (the ABC affiliate from Atlanta, GA) which I assume is not "Significantly Viewed" because of the difficulty of picking it up with an antenna. However, they also provide us with WCTV, the CBS affiliate from Thomasville, GA (part of the Tallahassee, FL DMA), a station that provides Terrell County, or at least most of Terrell County with "Grade B" coverage and should be considered "Significantly Viewed" for Terrell County.

While I'd like satellite to be able to offer me the same thing that cable offers me, such as WSB-TV, I really do feel that WCTV should be added to the list of "Significantly Viewed" stations for Terrell County.

I thank you for you time, and consideration of my comments.

Sincerely,
Alan Stevens
Dawson, GA
